

Augustus Hebblewhite

SOFTWARE ENGINEER

Profile

I'm a passionate and motivated programmer with a lot of experience in infrastructure engineering, machine learning and data analytics. My formal undergraduate studies in Economics, Philosophy and Electrical Engineering reflect my broad interest in a wide range of academic areas – both in the humanities and STEM – and have provided a foundation for my passion for self-learning.

Employment History

Software Engineer – Infrastructure, Blackmagic Design

JANUARY 2022 — PRESENT

- Maintaining the company build system, including the internal web app (Flask, SQLAlchemy) and the build servers themselves
- Working on several other internal tools:
  - Internally hosted LLM with RAG access to docs and source code (Ollama, Open WebUI)
  - MCP tools for external LLMs
  - In-house tools for PR tracking, testing, office parking and many more
- Primarily working in Python, with some exposure to TypeScript, Go, Bash and misc sysadmin tools

PhD Candidate, Monash University, Melbourne (did not complete)

OCTOBER 2018 — JANUARY 2022

- Developed Deep Learning based computer vision algorithms to improve generalisation of Artificial Intelligence agents to unseen and/or varying environments (CoinRun, Procgen)
- Worked extensively with PyTorch, Numpy, Linux and Git

Teaching Associate, Monash University, Melbourne

MARCH 2019 — JANUARY 2022

- Facilitated classes and taught content for fourth year Computer Vision (ECE4076) and first year electronics (ENG1002)

Research Assistant, QuantEcon (https://quantecon.org/), Canberra

APRIL 2017 — DECEMBER 2017

- Maintained and debugged Python and Julia code for the QuantEcon learning content, using test-driven development
- Contributed to new content, including interactive Jupyter notebooks

Technical Services Analyst, Experian Asia Pacific, Melbourne

DECEMBER 2015 — FEBRUARY 2017

- Automated internal data processing with Python and SQL
- Ran targeted Facebook ads with A/B testing to measure impact
- Built programs using Python, SQL and the Facebook SDK to assist the sales team

Side Projects

- **BirdBicara** – Android app for learning Indonesian vocab with flashcards. Integrates with LLMs to provide automatic translation of new words plus in-lesson context explanations.
- **MyWorld** – Website for creating personalised maps of places, to share local knowledge (e.g. great places to eat). (thisismyworld.fyi)
- **CaloRhino** – Cross-platform app for tracking calories with MCP support so AI assistants can estimate + log (not yet public)
- **BarbElephant** – Cross-platform app for powerlifting (not yet public)
- + many others

Details

Coburg
3058, Melbourne

Education

Graduate Diploma of Economics

Australian National University, Canberra

FEB 2017 — NOV 2017

WAM 80.25

Bachelor of Engineering with Honours and Bachelor of Arts

Monash University, Melbourne

FEB 2010 — NOV 2015

WAM 73.2
